SUMMARY

David Kirsch is Associate Professor of Strategy and Entrepreneurship at the Robert H. Smith School of Business at the University of Maryland, College Park. His research focuses on the intersection of problems of innovation and entrepreneurship, technological and business failure, and industry emergence and evolution. Kirsch has studied the history of alternatives to internal combustion (*The Electric Vehicle and the Burden of History* (2000)) and the intense period of technological entrepreneurship in the 1990s associated with the initial commercialization of the Internet. His 2019 book *Bubbles and Crashes: The Boom and Bust of Technological Innovation* (Stanford) generalizes the study of the Dot Com Era to a sample of more than 85 major technological innovations. His research has been published in *Management Science*, *Academy of Management Journal*, *Journal of Financial Economics* and *Strategic Management Journal*, and he has been the subject of feature stories in national publications including *The Washington Post*, *The New York Times*, and *The Chronicle of Higher Education*. Kirsch was a pioneer in identifying the importance of collecting digital business records and has partnered with NSF, the Library of Congress, the Alfred P. Sloan Foundation and the Hagley Museum and Library.
